

7,600 lives changed through free after school programs for elementary and middle school youth.

1,800 lives changed through free water safety classes for second graders in low-income schools.

The Community Development Branch's goal is to raise \$35,000 to help provide these life-changing programs.

LIFE CHANGING

.....
GREATER WICHITA YMCA. CELEBRATING 125 YEARS.

George had been part of the Y's after school program for two years. He struggled physically and academically, and was always chosen last when picking teams. An after school staff member helped George find a learning system that worked for him. Now, George is the first one to buzz in with answers during trivia contests, and he's an early team pick.
